Volume contents

Volume 35 (1995)

Dynamic behavior in glycolytic oscillations with phase shifts
I.M. de la Fuente, L. Martinez, J. Veguillas (Vizcaya, Spain) 1
Turing structures in a system with regulated gap-junctions
Ch.Th. Klein, F.F. Seelig (Tübingen, Germany) 15
A computational tool for analysis of immunoglobulin sequences
J.C. Almagro, E. Vargas-Madrazo, R. Zenteno-Cuevas, V. Hernández-Mendiola, F. Lara-Ochoa (Mexico, Veracruz, Mexico) 25
Global logic resulting from disequilibration process
Y.-P. Gunji (Kobe, Japan) 33
Photosynthetic oscillations and the interdependence of photophosphorylation and electron transport as studied by a mathematical model
W. Rovers, C. Giersch (Darmstadt, Germany) 63
Community treatment of HIV-1: initial stage and asymptotic dynamics
Y.-H. Hsieh, J.X. Velasco-Hernandez (Taiwan, ROC; Mexico, Mexico) 75
A dynamical model of the pulsatile secretion of the hypothalamo-pituitary-thyroid axis
G. Li, B. Liu, Y. Liu (Changchun, China) 83
Book Review 93

Introduction
D.M. Conrad (Detroit, MI) 99
Introduction to the Bioelectronic Devices Project in Japan
T. Watsuji, K. Nishi, T. Moriya, S. Maeda (Tokyo, Japan) 101
Towards efficient molecular wires and switches: the Brooker ions
J.R. Reimers, J.S. Craw, G.B. Bacskay, N.S. Hush (Sydney, Australia) 107
Two-dimensional domain shape transitions in photosensitive monolayer assemblies
M. Yoneyama, A. Fujii, S. Maeda, T. Murayama (Yokohama, Japan) 113
Fundamentals of photoelectric effects in molecular electronic thin film devices: applications to bacteriorhodopsin-based devices
F.T. Hong (Detroit, MI) 117
Oscillatory phenomena in model membrane: electrical oscillation in lipid-impregnated membrane filter induced by alamethicin and controlled by bacteriorhodopsin
M. Ikematsu, M. Iseki, Y. Sugiyama, A. Mizukami (Ibaraki, Japan) 123
4-Keto-bacteriorhodopsin films as a promising photochromic and electrochromic biological material
A.B. Druzhko, S.K. Chamorovsky, E.P. Lukashev, A.A. Kononenko, N.N. Vsevolodov (Moscow, Russia) 129

0303-2647/95/$09.50 © 1995 Elsevier Science Ireland Ltd. All rights reserved

The cycle of photochromic reactions of a bacteriorhodopsin analog with 4-keto-retinal
A.B. Druzhko, S.K. Chamorovsky (Moscow, Russia) 133
A method for patterning purple membrane using self-assembled monolayers
R.A. Brizzolara (Silver Spring, MD) 137
Holographic properties of Triton X-100-treated bacteriorhodopsin embedded in gelatin films
D.W. Cullin, N.N. Vsevolodov, T.V. Dyukova (Dahlgren, VA; Gaithersburg, MD) 141
Advances in protein-based three-dimensional optical memories
Z. Chen, D. Govender, R. Gross, R. Birge (Syracuse, NY) 145
Riboflavin: a potential material for molecular electronics applications
S. Alva, R.S. Phadke (Bombay, India) 153
Cross-scale interactions in biomolecular information processing
M. Conrad (Detroit, MI) 157
Scaling of efficiency in programmable and non-programmable systems
M. Conrad (Detroit, MI) 161
Enzymes, artificial cells and the nature of biological information
P.C. Marijuán (Zaragoza, Spain) 167
Dynamical self-organization in biomolecular systems of charge transport
L.N. Christophorov (Kiev, Ukraine) 171
Biological effects of environmental electromagnetic fields: molecular mechanisms
M. Blank (New York, NY) 175
Immobilization of enzymes/coenzymes for molecular electronics applications
R.S. Phadke (Bombay, India) 179
A highly stable and selective biosensor using modified nicotinic acetylcholine receptor (nAChR)
M. Eray, N.S. Dogan, S.R. Reiken, H. Sutisna, B.J. Van Wie, A.R. Koch, D.F. Moffett, M. Silber, W.C. Davis (Pullman, WA) 183
Optical neural device based on memory-type organic photoconductors
A. Fujii, M. Yoneyama, K. Ishihara, S. Maeda, T. Murayama (Yokohama, Japan) 189
Practical approach to implementation of neural nets at the molecular level
N.G. Rambidi (Moscow, Russia) 195
Directional guidance of neurite outgrowth using substrates patterned with biomaterials
M. Matsuzawa, V. Krauthamer, R.S. Potember (Laurel, Rockville, MD) 199
Molecular quantum computer of neuron
E.A. Liberman, S.V. Minina (Moscow, Russia) 203
Quantum and biological computation
K. Matsuno (Nagaoka, Japan) 209
Inter- and intracellular computation models based on Boolean vs. non-Boolean inconsistency
Y.-P. Gunji, H. Sadaoka, K. Ito (Kobe, Japan) 213
The information generated in a man-to-man game called "Renju (Go-bang)"
T. Nakamura, Y.-P. Gunji (Kobe, Japan) 219
A programmable interface to neuromolecular computing networks
K. Akingbehin (Detroit, MI) 223
Integrating molecular and digital computing: an information systems design perspective
R.R. Kampfner (Dearborn, MI) 229
The future of MEBC: panel discussion
G. Biczó (Budapest, Hungary) 233
